ELSEVIER

Thin Solid Films 343–344 (1999) 659–676

thin solid films

Subject index of Volume 343–344

a-Axis
Epitaxial growth and transport properties of *a*-axis oriented Hg-cuprate thin films, 98
Adhesion
Structure and adhesive properties of TiN films reactively deposited by plasma-free sputtering, 273
Adhesive characteristics
Adhesive characteristics of Fe films deposited by ion beam sputtering with Ar ion bombardment, 261
Adsorption
In situ observation of a high-temperature Si(001) surface during SiH_2Cl_2 exposure by photoelectron spectroscopy, 354
Hydrogen adsorption and desorption on SiGe investigated by in situ surface infrared spectroscopy, 404
Ag
Intermixing in immiscible Co/Ag/Co trilayers under XeCl laser annealing, 206
Formation of granular-like structure of Ag/Co multilayers by excimer laser irradiation, 214
Al doping
Effect of dopant flow rate upon photoluminescence properties in aluminum-doped ZnTe layers grown by MOVPE, 512
Alloys
Preparation of Mg_xNi thin films by RF-DC coupled magnetron sputtering, 21
Structural analysis of epitaxial TiAg/MgO superlattices prepared by multi-evaporation, 545
Co-sputtered Ru-Ti alloy electrodes for DRAM applications, 598
Alternating sputtering
Properties of films of multilayered ZnO:Al and ZnO deposited by an alternating sputtering method, 160
Alumina oxide coatings
Structure of alumina oxide coatings deposited by impulse plasma method, 324
Aluminium nitride
Raman and reflection anisotropy spectroscopic studies of GaN and AlN growth on GaAs(100), 575
Aluminum thin film
The influence of cooling water flowing in the sputtering target on aluminum based thin film nanostructure deposited on glass substrate, 465
Amorphous films
Thermally and photoinduced changes of structure and optical properties of As–Ga–S amorphous films and glasses, 488
Amorphous glasses
Thermally and photoinduced changes of structure and optical properties of As–Ga–S amorphous films and glasses, 488
Amorphous materials
In situ ellipsometric studies of the a-Si:H growth using an expanding thermal plasma, 281
Hydrogen in amorphous germanium-carbon, 445
Excitation energy dependence of luminescent sol-gel organically modified silicates, 476
Bond formation in ion beam synthesised amorphous gallium nitride, 632
Amorphous silicon carbide
Infra-red, X-ray photoelectron spectroscopy and electrical studies of r.f. sputtered amorphous silicon carbide films, 441
Amorphous silicon
Luminescence from hydrogenated amorphous silicon treated in microwave hydrogen plasma, KOH solution, and oxygen atmosphere, 191
Amorphous silicon films
Complete optical characterization of imperfect hydrogenated amorphous silicon layers by spectroscopic ellipsometry and spectroscopic reflectometry, 295
Anatase
Reactively sputtered TiO_{2-x} thin films with plasma-emission-controlled departure from stoichiometry, 152
Angle dependent X-ray photoelectron spectroscopy
Evaluation of the initial oxidation of heavily phosphorus doped silicon surfaces using angle-dependent X-ray photoelectron spectroscopy, 393
Annealing
Electrical and structural properties of rapid thermal annealed RF sputtered silicon oxide films, 108
Annealing effects of $CuInSe_2$ films prepared by pulsed laser deposition, 123
Infra-red, X-ray photoelectron spectroscopy and electrical studies of r.f. sputtered amorphous silicon carbide films, 441
Ar ion bombardment
Adhesive characteristics of Fe films deposited by ion beam sputtering with Ar ion bombardment, 261
Arc ion plating
Residual stress in TiN film deposited by arc ion plating, 257
Argon plasma etching
Argon plasma sputter etching induced defect levels in strained, epitaxial p-type Si–Ge alloys, 416
As–Ga–S
Thermally and photoinduced changes of structure and optical properties of As–Ga–S amorphous films and glasses, 488
As–S films
Photoinduced changes of the structure and index of refraction of amorphous As–S films, 484

PII: S0040-6090(99)000244-8

Atomic bonds
Dependence of carbon interatomic bonds on incident ion energy in carbon negative ion beam deposited films, 17
Atomic force microscopy
Vanadium oxide thin films deposited onto Cu buffer layer by RF magnetron sputtering, 168
Magnetoresistive properties and microstructure of NiFe thin films and NiFe(*t*)/Cu(*s*)/NiFe(*t*) multilayer films, 218
Evaluation of the initial oxidation of heavily phosphorus doped silicon surfaces using angle-dependent X-ray photoelectron spectroscopy, 393
AuGaAs
X-ray photoemission and photoreflectance study of Au/ultra-thin Si/*n*-GaAs Schottky contacts and hydrogen plasma treated semi-insulating GaAs surfaces, 328
Auger
Surfactant effect of atomic hydrogen on silicide-formation of nickel on Si(110) surfaces, 612
Auger depth profile
Ohmic contacts to p-type ZnTe using electroless Pd, 508
Auger electron spectroscopy
Reduction of thin oxide layer on $Fe_{60}Ni_{40}$ substrates in hydrogen plasmas, 101
Composition and properties of thin solid films on porous silicon surface, 335

Backbond
Initial stage oxidation at an unpaired dangling bond site on a Si(100)-2 × 1-H surface, 550
Band offset
Effect of a ZnSe intralayer on the Si/Ge(111) heterojunction band offsets, 605
Bayesian inference
Bayesian error analysis of Rutherford backscattering spectra, 31
Bi
Effects of reduced growth temperature on crystalline qualities and dopant diffusion in $Pb_{1-x}Sn_xSe$/PbSe layers grown by MBE, 317
Bi_2Se_3
Effects of reduced growth temperature on crystalline qualities and dopant diffusion in $Pb_{1-x}Sn_xSe$/PbSe layers grown by MBE, 317
Binary metal alloys
Magnetron sputtering of alloy and alloy-based films, 47
Bismuth
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Blue laser
Blue light emitting laser diodes, 345
Bonding configuration
Boron-induced electronic states in hydrogenated amorphous silicon, 285
Borides
Deposition and characterisation of TiAlBN coatings produced by direct electron-beam evaporation of Ti and Ti–Al–B–N material from a twin crucible source, 242
Boron
Preparation and Properties of Boron Thin Films, 342
Doping and electrical characteristics of in situ heavily B-doped $Si_{1-x}Ge_x$ films epitaxially grown using ultraclean LPCVD, 541
Boron carbon nitride
Deposition of boron carbon nitride films by dual cathode magnetron sputtering, 250
Boron nitride
Nanohardness and chemical bonding of boron nitride films, 238
Bowing parameter
Preparation and characterization of (Cd,Zn)S thin films by chemical bath deposition for photovoltaic devices, 516
Buffer layer
Vanadium oxide thin films deposited onto Cu buffer layer by RF magnetron sputtering, 168
Effect of deposition conditions of buffer layer on the characteristics of (Ba,Sr)TiO_3 thin films fabricated by a self-buffering process, 453

C-axis orientation
Abnormal residual stress state in ZnO films synthesized by planar magnetron sputtering system with two facing targets, 164
(Cd,Zn)S thin film
Preparation and characterization of (Cd,Zn)S thin films by chemical bath deposition for photovoltaic devices, 516
Cadium selenide
Point defects, dopant atoms, and compensation effects in CdSe and CdS cleavage surfaces, 537
Cadium sulfide
Effect of a CdS interlayer in thermochromism and photochromism of MoO_3 thin films, 202
Pbs–Cds bilayers prepared by the chemical bath deposition technique at different reaction temperatures, 587
Carbonization
Low-temperature epitaxial growth of cubic SiC thin films on Si(111) using supersonic molecular jet of single source precursors, 650
Catalytic-chemical vapor deposition
Surface cleaning and nitridation of compound semiconductors using gas-decomposition reaction in Cat-CVD method, 528
Cerium
Low temperature epitaxial growth of CeO_2(110) layers on Si(100) using electron beam assisted evaporation, 594
Chalcopyrite structure
Effect of substrate temperature on properties of thin films prepared by RF sputtering from $CuInSe_2$ target with Na_2Se, 320
Characterization
Preparation and characterization of (Cd,Zn)S thin films by chemical bath deposition for photovoltaic devices, 516
Chemical bath deposition
Preparation and characterization of (Cd,Zn)S thin films by chemical bath deposition for photovoltaic devices, 516
Pbs–Cds bilayers prepared by the chemical bath deposition technique at different reaction temperatures, 587
Chemical beam epitaxy
Incorporation of Ga metalorganic precursors during transients at the start of GaAs growth in CBE, 554
Raman and reflection anisotropy spectroscopic studies of GaN and AlN growth on GaAs(100), 575
Growth of $GaAs_{1-x}N_x$ on GaAs (100) by chemical beam epitaxy, 646

Chemical bonding
Nanohardness and chemical bonding of boron nitride films, 238
Chemical vapor deposition
Halide chemical vapour deposition of Ta_2O_5, 111
Transparent conductive tin oxide films by photochemical vapour deposition, 142
Preparation of ZnO films by atmospheric pressure chemical-vapor deposition using zinc acetylacetonate and ozone, 145
Real-time diagnostics of growth of silicon–germanium alloys on hydrogen-terminated and oxidized silicon (111) surfaces by spectroscopic ellipsometry, 427
Formation of Si-based organic thin films with low dielectric constant by using remote plasma enhanced chemical vapor deposition from hexamethyldisiloxane, 457
The effect of hydrogen on the electronic properties of CVD diamond films, 623
Influence of B- and N-doping levels on the quality and morphology of CVD diamond, 627
Chemisorption
Interaction of H_2O clusters with hydrogen-terminated and clean Si(001) surfaces, 397
Chromium borides
New Cr–B hard coatings by r.f.-plasma assisted magnetron sputtering method, 234
Cluster beams
Implantation of silicon using the boron cluster BF_2, 602
Co
Intermixing in immiscible Co/Ag/Co trilayers under XeCl laser annealing, 206
Formation of granular-like structure of Ag/Co multilayers by excimer laser irradiation, 214
CO_2 gas sensor
A new type of CO_2 sensor built up with plasma polymerized polyaniline thin film, 313
Coatings
New Cr–B hard coatings by r.f.-plasma assisted magnetron sputtering method, 234
TEA CO_2 laser-induced damage of low-thickness TiN coatings, 269
Coefficient of friction
Deposition of boron carbon nitride films by dual cathode magnetron sputtering, 250
Color centers
Effect of a CdS interlayer in thermochromism and photochromism of MoO_3 thin films, 202
Columnar growth structure
Columnar growth structure and evolution of wavy interface morphology in amorphous multilayered thin films, 5
Composite film
Palladium silicide/oxide formations in Pd/SiO_2 complex films, 119
Composition
Composition and properties of thin solid films on porous silicon surface, 335
Effects of nitrogen/argon ratio on composition and structure of InN films prepared by r.f. magnetron sputtering, 524
Computer simulation
Modelling thin film growth: Monte-Carlo models of fullerite films, 1
Evolution of crystals during vacuum deposition, 9
A hybrid simulation of high pressure sputtering, combining the Monte Carlo method and the diffusive approach, 24
Effect of In-content on the misfit dislocation interaction in InGaAs/GaAs layers, 302
Modeling of SiO_2/Si(100) interface structure by using extended Stillinger–Weber potential, 370
Condensation
Evolution of crystals during vacuum deposition, 9
Conductivity
Poole–Frenkel conductivity prior to electroforming in evaporated Au-SiO_x-Au sandwich structures, 94
Preparation of ZnO films by atmospheric pressure chemical-vapor deposition using zinc acetylacetonate and ozone, 145
Contacts
Characterization of ohmic and Schottky contacts on SiC, 637
Cross-sectional preparation
Cross-sectional specimen preparation from ICs downside for SEM and TEM-failure analyses using focused ion beam etching, 609
Crystal structure
Structure and adhesive properties of TiN films reactively deposited by plasma-free sputtering, 273
Effects of nitrogen/argon ratio on composition and structure of InN films prepared by r.f. magnetron sputtering, 524
Crystallization
Enhancement of crystallization of Si films on quartz substrates by electric fields, 288
Cubic SiC thin film
Low-temperature epitaxial growth of cubic SiC thin films on Si(111) using supersonic molecular jet of single source precursors, 650
$CuIn(S_xSe_{1-x})_2$
Preparation of $CuIn(S_xSe_{1-x})_2$ thin films by excimer laser ablation from binary compounds, 199
$CuIn_3Se_5$
Effect of substrate temperature on properties of thin films prepared by RF sputtering from $CuInSe_2$ target with Na_2Se, 320
$CuInSe_2$ (CIS)
Piezoelectric photoacoustic spectra of $CuInSe_2$ thin film grown by molecular beam epitaxy, 591
$CuInSe_2$
Effect of substrate temperature on properties of thin films prepared by RF sputtering from $CuInSe_2$ target with Na_2Se, 320
Current–Voltage
The metastability of porous silicon/crystalline silicon structure, 277
CVD diamond film
The effect of hydrogen on the electronic properties of CVD diamond films, 623

Dangling bond
Initial stage oxidation at an unpaired dangling bond site on a Si(100)-2 × 1-H surface, 550
DC conductivity
Deposition and properties of plasma polymer films made from thiophenes, 338
Deep level transient spectroscopy
Argon plasma sputter etching induced defect levels in strained, epitaxial p-type Si–Ge alloys, 416

Defect engineering
Argon plasma sputter etching induced defect levels in strained, epitaxial p-type Si–Ge alloys, 416
Defect states
Boron-induced electronic states in hydrogenated amorphous silicon, 285
Density functional calculations
Interaction of H_2O clusters with hydrogen-terminated and clean Si(001) surfaces, 397
Density of states
Boron-induced electronic states in hydrogenated amorphous silicon, 285
Deposition process
Effect of DC bias on the deposition rate using RF-DC coupled magnetron sputtering for Mg thin films, 57
Epitaxial growth of nitride semiconductor films by laser ablation, 127
Preparation of ZnO films by atmospheric pressure chemical-vapor deposition using zinc acetylacetonate and ozone, 145
Preparation and Properties of Boron Thin Films, 342
Deposition
The influence of ion bombardment intensity during deposition on nickel films microstructure, 75
Deposition rate
Hard a-C:H films deposited at high deposition rates, 222
Depth profiling
Non-destructive chemical analysis of sandwich structures by means of soft X-ray emission, 35
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Characterization of ohmic and Schottky contacts on SiC, 637
Desorption
In situ observation of a high-temperature Si(001) surface during SiH_2Cl_2 exposure by photoelectron spectroscopy, 354
Deuterium atoms
Influences of deuterium atoms on local bonding structures of SiO_2 studied by HREELS, 408
Diamond
Influence of diamond crystal orientation on their tribological behaviour under various environments, 226
Effects of plasma etching on DLC films, 381
Influence of B- and N-doping levels on the quality and morphology of CVD diamond, 627
Diamond like carbon
Hard a-C:H films deposited at high deposition rates, 222
Diamond like carbon films
Dependence of carbon interatomic bonds on incident ion energy in carbon negative ion beam deposited films, 17
Dielectrics
An effect of preheat-treatment on the formation of titanium-oxide films by sintering a titanium/silicon-oxide structure in an oxygen atmosphere, 138
Optical and electrical characterisation of Ta_2O_5 thin films for ionic conduction applications, 449
Formation of Si-based organic thin films with low dielectric constant by using remote plasma enhanced chemical vapor deposition from hexamethyldisiloxane, 457
Dielectric constant
Halide chemical vapour deposition of Ta_2O_5, 111
Effect of deposition conditions of buffer layer on the characteristics of $(Ba,Sr)TiO_3$ thin films fabricated by a self-buffering process, 453
Dielectric films
Radiation enhanced growth rates during plasma oxidation of silicon, 420
Diffusion
Modelling thin film growth: Monte-Carlo models of fullerite films, 1
A hybrid simulation of high pressure sputtering, combining the Monte Carlo method and the diffusive approach, 24
Effects of reduced growth temperature on crystalline qualities and dopant diffusion in $Pb_{1-x}Sn_xSe/PbSe$ layers grown by MBE, 317
Dipole
Effect of a ZnSe intralayer on the Si/Ge(111) heterojunction band offsets, 605
Discrete level
Tunneling spectrum characteristic reflecting discrete energy levels in Pb(Tl)Te Films, 27
DLTS
The metastability of porous silicon/crystalline silicon structure, 277
Doping
Effects of reduced growth temperature on crystalline qualities and dopant diffusion in $Pb_{1-x}Sn_xSe/PbSe$ layers grown by MBE, 317
Point defects, dopant atoms, and compensation effects in CdSe and CdS cleavage surfaces, 537
Doping and electrical characteristics of in situ heavily B-doped $Si_{1-x}Ge_x$ films epitaxially grown using ultraclean LPCVD, 541
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Dry lithiation
Deep profiles of lithium in electrolytic structures of ITO/WO_3 for electrochromic applications, 179
Dual ion beam sputtering
Effect of surface roughness on magnetic properties of Fe films deposited by dual ion beam sputtering, 67

ECR plasma CVD
Structural analysis of nanocrystalline SiC thin films grown on silicon by ECR plasma CVD, 292
Elastic properties
Characterization of mechanical properties of VO_2 thin films on sapphire and silicon by ultra-microindentation, 134
Elastic recoil detection analysis spectra
Preparation and optical transmittance of titanium hydride (deuteride) films by r.f. reactive sputtering, 195
Electric field
Enhancement of crystallization of Si films on quartz substrates by electric fields, 288
Electrical characteristics
Doping and electrical characteristics of in situ heavily B-doped $Si_{1-x}Ge_x$ films epitaxially grown using ultraclean LPCVD, 541
Electrical measurements
Optical and electrical characterisation of Ta_2O_5 thin films for ionic conduction applications, 449
Electrical properties

Optical and electrical characterisation of Ta_2O_5 thin films for ionic conduction applications, 449
Electrochromic
Deep profiles of lithium in electrolytic structures of ITO/WO_3 for electrochromic applications, 179
Electrochromism
Study of electrochromic cells incorporating WO_3, MoO_3, WO_3–MoO_3 and V_2O_5 coatings, 183
Electroless deposition
Ohmic contacts to p-type ZnTe using electroless Pd, 508
Electron cyclotron resonance method
Optical absorption in amorphous hydrogenated silicon nitride thin films deposited by the electron cyclotron resonance plasma method and subjected to rapid thermal annealing, 433
Electron energy-loss spectroscopy
Plasmon loss features of germanium nanocrystals fabricated by the cluster beam evaporation technique, 481
Electron localization
Resistivity and structural defects of reactively sputtered TiN and HfN films, 246
Electron microscope
Preparation and Properties of Boron Thin Films, 342
Electron microscopy
Electron microscopy study of SiC obtained by the carbonization of Si(111), 305
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
Electron scattering
Magnetoresistive properties and microstructure of NiFe thin films and NiFe(t)/Cu(s)/NiFe(t) multilayer films, 218
Electronic structure
ZnS wide band gap semiconductor thin film electronic structure sensitivity to Mn impurity, 332
Electronics
Epitaxial growth of nitride semiconductor films by laser ablation, 127
Preparation and Properties of Boron Thin Films, 342
Ellipsometry
Ellipsometric studies on thin silver films epitaxially grown on Si(111), 187
In situ ellipsometric studies of the a-Si:H growth using an expanding thermal plasma, 281
Composition and properties of thin solid films on porous silicon surface, 335
Real-time diagnostics of growth of silicon–germanium alloys on hydrogen-terminated and oxidized silicon (111) surfaces by spectroscopic ellipsometry, 427
Energetic oxygen atoms and ions
Energetic oxygen particles in the reactive sputtering of Zn targets in Ar/O_2 atmospheres, 81
Energy loss spectroscopy
Compositional and structural transition layer studied by the energy loss of O 1s photoelectrons, 410
Epitaxial $CoSi_2$(100)
Effects of initial surface states on formation processes of epitaxial $CoSi_2$(100) on Si(100), 562
Epitaxial film growth
Optimizing GaSb($\bar{1}\bar{1}\bar{1}$) and GaSb(001) surfaces for epitaxial film growth, 500
Structural analysis of epitaxial TiAg/MgO superlattices prepared by multi-evaporation, 545
Epitaxy
Epitaxial growth and transport properties of a-axis oriented Hg-cuprate thin films, 98
Epitaxial growth of nitride semiconductor films by laser ablation, 127
Characterization of mechanical properties of VO_2 thin films on sapphire and silicon by ultra-microindentation, 134
Effect of In-content on the misfit dislocation interaction in InGaAs/GaAs layers, 302
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
Doping and electrical characteristics of in situ heavily B-doped $Si_{1-x}Ge_x$ films epitaxially grown using ultraclean LPCVD, 541
Influence of substrate misorientation on the structural characteristics of InGaAs/GaAs MQW on (111)B GaAs grown by MBE, 558
Low temperature growth of p-type crystalline silicon films by ECR plasma CVD, 571
Low temperature epitaxial growth of CeO_2(110) layers on Si(100) using electron beam assisted evaporation, 594
Etching
Luminescence from hydrogenated amorphous silicon treated in microwave hydrogen plasma, KOH solution, and oxygen atmosphere, 191
Hydrofluoric acid etching of ultra thin silicon oxide film fabricated by high purity ozone, 361
Anisotropic inductively coupled plasma etching of silicon with pure SF_6, 378
Effects of plasma etching on DLC films, 381
Evaporation
Evolution of crystals during vacuum deposition, 9
Poole–Frenkel conductivity prior to electroforming in evaporated Au-SiO_x-Au sandwich structures, 94
Deposition and characterisation of TiAlBN coatings produced by direct electron-beam evaporation of Ti and Ti–Al–B–N material from a twin crucible source, 242
Low temperature epitaxial growth of CeO_2(110) layers on Si(100) using electron beam assisted evaporation, 594

Fe films
Effect of surface roughness on magnetic properties of Fe films deposited by dual ion beam sputtering, 67
An estimation of optimum Ar ion bombardment energy for good Fe films applying thermal spike effect, 71
Adhesive characteristics of Fe films deposited by ion beam sputtering with Ar ion bombardment, 261
Ferroelectric
Co-sputtered Ru-Ti alloy electrodes for DRAM applications, 598
Ferroelectric thin film
Reactive pulsed laser deposition of piezoelectric and ferroelectric thin films, 90
Film stress
The control of film stress using ionised magnetron sputter deposition, 39
Formation energy

Boron-induced electronic states in hydrogenated amorphous silicon, 285
Fourier transform infrared spectroscopy (FTIR)
Deposition of boron carbon nitride films by dual cathode magnetron sputtering, 250
Full composition range silicon oxynitride films deposited by ECR-PECVD at room temperature, 437
Infra-red, X-ray photoelectron spectroscopy and electrical studies of r.f. sputtered amorphous silicon carbide films, 441
Bond formation in ion beam synthesised amorphous gallium nitride, 632
Fractals
Modelling thin film growth: Monte-Carlo models of fullerite films, 1
Fullerite films
Modelling thin film growth: Monte-Carlo models of fullerite films, 1

GaAs
X-ray photoemission and photoreflectance study of Au/ultrathin Si/*n*-GaAs Schottky contacts and hydrogen plasma treated semi-insulating GaAs surfaces, 328
Recent understandings of elementary growth processes in MBE of GaAs, 495
Surface cleaning and nitridation of compound semiconductors using gas-decomposition reaction in Cat-CVD method, 528
GaAs(001)
The (3 × 3) reconstruction and its evolution during the nitridation of GaAs(001), 567
$GaAs_{1-x}N_x$ films
Growth of $GaAs_{1-x}N_x$ on GaAs (100) by chemical beam epitaxy, 646
Gallium arsenide
Scaling behaviour and evolution of ferromagnetism in epitaxial Fe/GaAs(100) and Fe/InAs(100), 210
Effect of In-content on the misfit dislocation interaction in InGaAs/GaAs layers, 302
Influence of substrate misorientation on the structural characteristics of InGaAs/GaAs MQW on (111)B GaAs grown by MBE, 558
Gallium nitride
Surface cleaning and nitridation of compound semiconductors using gas-decomposition reaction in Cat-CVD method, 528
Raman and reflection anisotropy spectroscopic studies of GaN and AlN growth on GaAs(100), 575
Bond formation in ion beam synthesised amorphous gallium nitride, 632
A research on the persistent photoconductivity behavior of GaN thin films deposited by r.f. magnetron sputtering, 642
GaSb($\bar{1}\bar{1}\bar{1}$)
Optimizing GaSb($\bar{1}\bar{1}\bar{1}$) and GaSb(001) surfaces for epitaxial film growth, 500
GaSb(001)
Optimizing GaSb($\bar{1}\bar{1}\bar{1}$) and GaSb(001) surfaces for epitaxial film growth, 500
Germanium
Reactive co-evaporation of Si and Ge in oxygen atmospheres, 13
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Ge-C
Hydrogen in amorphous germanium-carbon, 445
Giant magnetoresistance
Intermixing in immiscible Co/Ag/Co trilayers under XeCl laser annealing, 206
Formation of granular-like structure of Ag/Co multilayers by excimer laser irradiation, 214
Glass substrate
Relationship of grain nanostructure and orientation in whisker growth on aluminum thin films on glass substrates, 461
Glow discharge mass spectroscopy
Investigation of SiO_2 deposition processes with mass spectrometry and optical emission spectroscopy in plasma enhanced chemical vapor deposition using tetraethoxysilane, 148
Glow discharge optical spectroscopy
Investigation of SiO_2 deposition processes with mass spectrometry and optical emission spectroscopy in plasma enhanced chemical vapor deposition using tetraethoxysilane, 148
Grain boundary
Magnetoresistive properties and microstructure of NiFe thin films and NiFe(*t*)/Cu(*s*)/NiFe(*t*) multilayer films, 218
Growth mechanism
Evolution of crystals during vacuum deposition, 9
In situ ellipsometric studies of the a-Si:H growth using an expanding thermal plasma, 281

Hall mobility
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Hard coatings
The determination of nitrogen in Cr–N system by RBS and the weight gain technique, 265
Structure and adhesive properties of TiN films reactively deposited by plasma-free sputtering, 273
Hardness
Characterization of mechanical properties of VO_2 thin films on sapphire and silicon by ultra-microindentation, 134
Hard a-C:H films deposited at high deposition rates, 222
New Cr–B hard coatings by r.f.-plasma assisted magnetron sputtering method, 234
Nanohardness and chemical bonding of boron nitride films, 238
Titanium carbide film deposition by DC magnetron reactive sputtering using a solid carbon source, 254
Heat treatment
Structural analysis of epitaxial TiAg/MgO superlattices prepared by multi-evaporation, 545
Heavily P-doped Si
Evaluation of the initial oxidation of heavily phosphorus doped silicon surfaces using angle-dependent X-ray photoelectron spectroscopy, 393
Heteroepitaxial growth
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Heterojunction
Effect of a ZnSe intralayer on the Si/Ge(111) heterojunction band offsets, 605
HfN
Resistivity and structural defects of reactively sputtered TiN and HfN films, 246

HF-treatment
Evaluation of the initial oxidation of heavily phosphorus doped silicon surfaces using angle-dependent X-ray photoelectron spectroscopy, 393
Hg-cuprate
Epitaxial growth and transport properties of *a*-axis oriented Hg-cuprate thin films, 98
High density plasma
LPCVD deposition of silicon nitride assisted by high density plasmas, 299
High temperature electronics
Wide bandgap semiconductor materials for high temperature electronics, 616
High-T structures
Magnetron sputtering of alloy and alloy-based films, 47
Hillock
The influence of cooling water flowing in the sputtering target on aluminum based thin film nanostructure deposited on glass substrate, 465
Höfer precursor
Kelvin probe study of metastable states during initial oxygen adsorption dynamics on Si(111) 7 × 7, 492
Homoepitaxzy
Homoepitaxial growth of ZnTe by synchrotron radiation using metalorganic sources, 504
Hot wire chemical vapor deposition
Surface cleaning and nitridation of compound semiconductors using gas-decomposition reaction in Cat-CVD method, 528
Hot-wall epitaxy
Tunneling spectrum characteristic reflecting discrete energy levels in Pb(Tl)Te Films, 27
Hydride vapor phase epitaxy
Blue light emitting laser diodes, 345
Hydrogen passivated Si(100)
First principle study of hydrogen passivated Si(100) initial state of oxidation, 350
Hydrogen plasma
X-ray photoemission and photoreflectance study of Au/ultra-thin Si/*n*-GaAs Schottky contacts and hydrogen plasma treated semi-insulating GaAs surfaces, 328
Hydrogen storage
Effect of DC bias on the deposition rate using RF-DC coupled magnetron sputtering for Mg thin films, 57
Hydrogen termination
Initial stage oxidation at an unpaired dangling bond site on a Si(100)-2 × 1-H surface, 550
Hydrogen
Reduction of thin oxide layer on $Fe_{60}Ni_{40}$ substrates in hydrogen plasmas, 101
Oxidation kinetics of hydrogen-enriched Si(100) and Si(111) surfaces, 389
Hydrogen adsorption and desorption on SiGe investigated by in situ surface infrared spectroscopy, 404
Hydrogen in amorphous germanium-carbon, 445
Surfactant effect of atomic hydrogen on silicide-formation of nickel on Si(110) surfaces, 612
The effect of hydrogen on the electronic properties of CVD diamond films, 623
Hydrogenation
Luminescence from hydrogenated amorphous silicon treated in microwave hydrogen plasma, KOH solution, and oxygen atmosphere, 191

IC structures
Cross-sectional specimen preparation from ICs downside for SEM and TEM-failure analyses using focused ion beam etching, 609
Impulse plasma method
Structure of alumina oxide coatings deposited by impulse plasma method, 324
Impurities
Tunneling spectrum characteristic reflecting discrete energy levels in Pb(Tl)Te Films, 27
ZnS wide band gap semiconductor thin film electronic structure sensitivity to Mn impurity, 332
In situ observation
In situ observation of a high-temperature Si(001) surface during SiH_2Cl_2 exposure by photoelectron spectroscopy, 354
Incorporation diffusion length
Recent understandings of elementary growth processes in MBE of GaAs, 495
Indium arsenide
Scaling behaviour and evolution of ferromagnetism in epitaxial Fe/GaAs(100) and Fe/InAs(100), 210
Effect of In-content on the misfit dislocation interaction in InGaAs/GaAs layers, 302
Influence of substrate misorientation on the structural characteristics of InGaAs/GaAs MQW on (111)B GaAs grown by MBE, 558
Indium nitride
Effects of nitrogen/argon ratio on composition and structure of InN films prepared by r.f. magnetron sputtering, 524
Indium oxide
The properties of reactively-sputtered, stoichiometry-controlled and optimum-conductivity transparent indium oxide films as a function of their titanium, aluminium and zinc content; comparisons with the use of tin as a dopant, 115
Indium-tin-oxide
The properties of reactively-sputtered, stoichiometry-controlled and optimum-conductivity transparent indium oxide films as a function of their titanium, aluminium and zinc content; comparisons with the use of tin as a dopant, 115
Infrared spectroscopy
Hydrogen adsorption and desorption on SiGe investigated by in situ surface infrared spectroscopy, 404
Bond formation in ion beam synthesised amorphous gallium nitride, 632
InGaN
Blue light emitting laser diodes, 345
Insulator
Optical and electrical characterisation of Ta_2O_5 thin films for ionic conduction applications, 449
Interfaces
Effect of In-content on the misfit dislocation interaction in InGaAs/GaAs layers, 302
Modeling of SiO_2/Si(100) interface structure by using extended Stillinger–Weber potential, 370
Influence of substrate misorientation on the structural charac-

teristics of InGaAs/GaAs MQW on (111)B GaAs grown by MBE, 558
Intersurface diffusion
Recent understandings of elementary growth processes in MBE of GaAs, 495
Intralayer
Effect of a ZnSe intralayer on the Si/Ge(111) heterojunction band offsets, 605
Ion assisted deposition
The control of film stress using ionised magnetron sputter deposition, 39
Ion beam analysis
Bayesian error analysis of Rutherford backscattering spectra, 31
Ion beam deposition
Dependence of carbon interatomic bonds on incident ion energy in carbon negative ion beam deposited films, 17
Ion beam etching
Extremely smooth surface morphologies in $N_2/H_2/CH_4$ based low energy chemically assisted ion beam etching of InP/GaInAsP, 374
Cross-sectional specimen preparation from ICs downside for SEM and TEM-failure analyses using focused ion beam etching, 609
Ion beam sputtering
Adhesive characteristics of Fe films deposited by ion beam sputtering with Ar ion bombardment, 261
Ion bombardment
The control of film stress using ionised magnetron sputter deposition, 39
An estimation of optimum Ar ion bombardment energy for good Fe films applying thermal spike effect, 71
Ion bombardment intensity
The influence of ion bombardment intensity during deposition on nickel films microstructure, 75
Ion implantation
Implantation of silicon using the boron cluster BF_2, 602
Ion-beam
Palladium silicide/oxide formations in Pd/SiO_2 complex films, 119
Ion-exchangeable thin films
Novel methods for preparation of ion-exchangeable thin films, 156
Iron
Reduction of thin oxide layer on $Fe_{60}Ni_{40}$ substrates in hydrogen plasmas, 101

Kelvin probe
Kelvin probe study of metastable states during initial oxygen adsorption dynamics on Si(111) 7×7, 492
Kinetics of generation
On the kinetics of generation of point defects in the $Si–SiO_2$ system, 412

Large glass substrate
The influence of cooling water flowing in the sputtering target on aluminum based thin film nanostructure deposited on glass substrate, 465
Laser ablation
Epitaxial growth of nitride semiconductor films by laser ablation, 127
Preparation of $CuIn(S_xSe_{1-x})_2$ thin films by excimer laser ablation from binary compounds, 199
TEA CO_2 laser-induced damage of low-thickness TiN coatings, 269
Laser irradiation
Intermixing in immiscible Co/Ag/Co trilayers under XeCl laser annealing, 206
Formation of granular-like structure of Ag/Co multilayers by excimer laser irradiation, 214
Lead sulfide
Pbs–Cds bilayers prepared by the chemical bath deposition technique at different reaction temperatures, 587
Leakage current density
Effect of deposition conditions of buffer layer on the characteristics of $(Ba,Sr)TiO_3$ thin films fabricated by a self-buffering process, 453
Lifetime
Blue light emitting laser diodes, 345
Low energy electron diffraction
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Low pressure chemical vapor deposition
LPCVD deposition of silicon nitride assisted by high density plasmas, 299
Doping and electrical characteristics of in situ heavily B-doped $Si_{1-x}Ge_x$ films epitaxially grown using ultraclean LPCVD, 541
Low temperature
Optical and electrical properties of embedded silver nanoparticles at low temperatures, 175
Low temperature growth
Homoepitaxial growth of ZnTe by synchrotron radiation using metalorganic sources, 504
Luminescence
Luminescence from hydrogenated amorphous silicon treated in microwave hydrogen plasma, KOH solution, and oxygen atmosphere, 191
Excitation energy dependence of luminescent sol-gel organically modified silicates, 476

Magnesium
Preparation of Mg_xNi thin films by RF-DC coupled magnetron sputtering, 21
Effect of DC bias on the deposition rate using RF-DC coupled magnetron sputtering for Mg thin films, 57
Magnetic films
Scaling behaviour and evolution of ferromagnetism in epitaxial Fe/GaAs(100) and Fe/InAs(100), 210
Magnetic measurement
Magnetoresistive properties and microstructure of NiFe thin films and NiFe(t)/Cu(s)/NiFe(t) multilayer films, 218
Magnetic properties
Effect of surface roughness on magnetic properties of Fe films deposited by dual ion beam sputtering, 67
Magnetoresistive properties and microstructure of NiFe thin films and NiFe(t)/Cu(s)/NiFe(t) multilayer films, 218
Magnetoresistance
Epitaxial growth and transport properties of a-axis oriented Hg-cuprate thin films, 98

Magnetron sputtering
The control of film stress using ionised magnetron sputter deposition, 39
Magnetron sputtering of alloy and alloy-based films, 47
Deposition of boron carbon nitride films by dual cathode magnetron sputtering, 250
Markov chain Monte Carlo
Bayesian error analysis of Rutherford backscattering spectra, 31
Materials
Piezoelectric photoacoustic spectra of $CuInSe_2$ thin film grown by molecular beam epitaxy, 591
Mechanical properties
The influence of silver on the structure and mechanical properties of (TiAl)-based intermetallics, 43
Me-PTC
Molecular arrangement of organic crystal *N,N′*-dimethylperylene-3,4,9,10-bis(dicarboximide) studied with metastable de-excitation spectroscopy and atomic force microscopy, 309
Metal–semiconductor interfaces
Scaling behaviour and evolution of ferromagnetism in epitaxial Fe/GaAs(100) and Fe/InAs(100), 210
Metalorganic chemical vapor deposition
Blue light emitting laser diodes, 345
Metal-oxide-semiconductor structure
Electrical and structural properties of rapid thermal annealed RF sputtered silicon oxide films, 108
Metastability
The metastability of porous silicon/crystalline silicon structure, 277
Metastable de-excitation spectroscopy
Molecular arrangement of organic crystal *N,N′*-dimethylperylene-3,4,9,10-bis(dicarboximide) studied with metastable de-excitation spectroscopy and atomic force microscopy, 309
Metastable states
Kelvin probe study of metastable states during initial oxygen adsorption dynamics on Si(111) 7×7, 492
MgO
Structura1 analysis of epitaxial TiAg/MgO superlattices prepared by multi-evaporation, 545
MgO thin film
MgO thin film deposition using TVA (thermoionic vacuum arc), 63
Microcrystal
Luminescence from hydrogenated amorphous silicon treated in microwave hydrogen plasma, KOH solution, and oxygen atmosphere, 191
Microstructure
The influence of ion bombardment intensity during deposition on nickel films microstructure, 75
Mismatched heteroepitaxial systems
Selective electrochemical profiling of threading defects in mismatched heteroepitaxial systems, 520
Modification
Effect of a ZnSe intralayer on the Si/Ge(111) heterojunction band offsets, 605
Molecular arrangement
Molecular arrangement of organic crystal *N,N′*-dimethylperylene-3,4,9,10-bis(dicarboximide) studied with metastable de-excitation spectroscopy and atomic force microscopy, 309
Molecular beam deposition
Ordering of PVBA on amorphous SiO_2 and Pd(110), 171
Molecular beam epitaxy
Effects of reduced growth temperature on crystalline qualities and dopant diffusion in $Pb_{1-x}Sn_xSe/PbSe$ layers grown by MBE, 317
Recent understandings of elementary growth processes in MBE of GaAs, 495
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Molecular dynamics
Implantation of silicon using the boron cluster BF_2, 602
Molybdenum oxide
Effect of a CdS interlayer in thermochromism and photochromism of MoO_3 thin films, 202
Monolayer
Magnetoresistive properties and microstructure of NiFe thin films and NiFe(*t*)/Cu(*s*)/NiFe(*t*) multilayer films, 218
Morphology
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
MOVPE
Effect of dopant flow rate upon photoluminescence properties in aluminum-doped ZnTe layers grown by MOVPE, 512
Multilayered film
Properties of films of multilayered ZnO:Al and ZnO deposited by an alternating sputtering method, 160
Multilayered thin films
Columnar growth structure and evolution of wavy interface morphology in amorphous multilayered thin films, 5
Multilayers
Non-destructive chemical analysis of sandwich structures by means of soft X-ray emission, 35
Intermixing in immiscible Co/Ag/Co trilayers under XeCl laser annealing, 206
Formation of granular-like structure of Ag/Co multilayers by excimer laser irradiation, 214
Magnetoresistive properties and microstructure of NiFe thin films and NiFe(*t*)/Cu(*s*)/NiFe(*t*) multilayer films, 218

Nanocrystal
New Cr–B hard coatings by r.f.-plasma assisted magnetron sputtering method, 234
Nanocrystalline and nanocomposite films
Magnetron sputtering of alloy and alloy-based films, 47
Nanoparticles - structure
Plasmon loss features of germanium nanocrystals fabricated by the cluster beam evaporation technique, 481
Nanostructures - electron states
Plasmon loss features of germanium nanocrystals fabricated by the cluster beam evaporation technique, 481
Negative-ion beam
Dependence of carbon interatomic bonds on incident ion energy in carbon negative ion beam deposited films, 17
Nickel
Characterization of ohmic and Schottky contacts on SiC, 637
Nickel

Preparation of Mg_xNi thin films by RF-DC coupled magnetron sputtering, 21
Reduction of thin oxide layer on $Fe_{60}Ni_{40}$ substrates in hydrogen plasmas, 101
Surfactant effect of atomic hydrogen on silicide-formation of nickel on Si(110) surfaces, 612
Nitridation
The (3 × 3) reconstruction and its evolution during the nitridation of GaAs(001), 567
Nitrides
Epitaxial growth of nitride semiconductor films by laser ablation, 127
Raman and reflection anisotropy spectroscopic studies of GaN and AlN growth on GaAs(100), 575
Nitrides of binary alloys
Magnetron sputtering of alloy and alloy-based films, 47
Nitrogen/Argon ratio
Effects of nitrogen/argon ratio on composition and structure of InN films prepared by r.f. magnetron sputtering, 524
N-type doping
Effect of dopant flow rate upon photoluminescence properties in aluminum-doped ZnTe layers grown by MOVPE, 512
Nucleation
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
Nucleation in-vacuum deposition
Vanadium oxide thin films deposited onto Cu buffer layer by RF magnetron sputtering, 168

O 1s photoelectron
Compositional and structural transition layer studied by the energy loss of O 1s photoelectrons, 410
Oblique incidence
Ordering of PVBA on amorphous SiO_2 and Pd(110), 171
Ohmic contact
Ohmic contacts to p-type ZnTe using electroless Pd, 508
Optical anisotropy
Ordering of PVBA on amorphous SiO_2 and Pd(110), 171
Optical coatings
The properties of reactively-sputtered, stoichiometry-controlled and optimum-conductivity transparent indium oxide films as a function of their titanium, aluminium and zinc content; comparisons with the use of tin as a dopant, 115
Study of electrochromic cells incorporating WO_3, MoO_3, WO_3–MoO_3 and V_2O_5 coatings, 183
Optical constants
Optical and electrical properties of embedded silver nanoparticles at low temperatures, 175
Complete optical characterization of imperfect hydrogenated amorphous silicon layers by spectroscopic ellipsometry and spectroscopic reflectometry, 295
Optical emission spectroscopy
Deposition and properties of plasma polymer films made from thiophenes, 338
Optical monitoring
Incorporation of Ga metalorganic precursors during transients at the start of GaAs growth in CBE, 554
Optical properties
Reactively sputtered TiO_{2-x} thin films with plasma-emission-controlled departure from stoichiometry, 152
Deep profiles of lithium in electrolytic structures of ITO/WO_3 for electrochromic applications, 179
Ellipsometric studies on thin silver films epitaxially grown on Si(111), 187
Real-time diagnostics of growth of silicon–germanium alloys on hydrogen-terminated and oxidized silicon (111) surfaces by spectroscopic ellipsometry, 427
Optical absorption in amorphous hydrogenated silicon nitride thin films deposited by the electron cyclotron resonance plasma method and subjected to rapid thermal annealing, 433
Optical and electrical characterisation of Ta_2O_5 thin films for ionic conduction applications, 449
Thermally and photoinduced changes of structure and optical properties of As–Ga–S amorphous films and glasses, 488
Optical spectroscopy
Investigation of SiO_2 deposition processes with mass spectrometry and optical emission spectroscopy in plasma enhanced chemical vapor deposition using tetraethoxysilane, 148
Optical transmittance
Preparation and optical transmittance of titanium hydride (deuteride) films by r.f. reactive sputtering, 195
Optics
Preparation and Properties of Boron Thin Films, 342
Optics and Opto-electronics
Annealing effects of $CuInSe_2$ films prepared by pulsed laser deposition, 123
Optoelectronics
Preparation and Properties of Boron Thin Films, 342
Organic molecules
Ordering of PVBA on amorphous SiO_2 and Pd(110), 171
Organometallic vapor deposition
Preparation of ZnO films by atmospheric pressure chemical-vapor deposition using zinc acetylacetonate and ozone, 145
Oxidation
Luminescence from hydrogenated amorphous silicon treated in microwave hydrogen plasma, KOH solution, and oxygen atmosphere, 191
Influence of diamond crystal orientation on their tribological behaviour under various environments, 226
First principle study of hydrogen passivated Si(100) initial state of oxidation, 350
Hydrofluoric acid etching of ultra thin silicon oxide film fabricated by high purity ozone, 361
Modeling of SiO_2/Si(100) interface structure by using extended Stillinger–Weber potential, 370
Oxidation kinetics of hydrogen-enriched Si(100) and Si(111) surfaces, 389
Kelvin probe study of metastable states during initial oxygen adsorption dynamics on Si(111) 7 × 7, 492
Initial stage oxidation at an unpaired dangling bond site on a Si(100)-2 × 1-H surface, 550
Oxidation processes
Influences of deuterium atoms on local bonding structures of SiO_2 studied by HREELS, 408
Oxidation resistance

The oxidation behaviour of mixed tungsten silicon sputtered coatings, 51
Oxidation-induced stress
Spectroscopic ellipsometry characterization of strained interface region in thermally oxidized Si(111), 385
Oxides
Reduction of thin oxide layer on $Fe_{60}Ni_{40}$ substrates in hydrogen plasmas, 101
Transparent conductive tin oxide films by photochemical vapour deposition, 142
Low temperature epitaxial growth of CeO_2(110) layers on Si(100) using electron beam assisted evaporation, 594
Oxygen
Reactive co-evaporation of Si and Ge in oxygen atmospheres, 13
Oxygen impurity
Resistivity and structural defects of reactively sputtered TiN and HfN films, 246
Ozone
Preparation of ZnO films by atmospheric pressure chemical-vapor deposition using zinc acetylacetonate and ozone, 145
Hydrofluoric acid etching of ultra thin silicon oxide film fabricated by high purity ozone, 361

Palladium
Ordering of PVBA on amorphous SiO_2 and Pd(110), 171
Paraelectric
Co-sputtered Ru-Ti alloy electrodes for DRAM applications, 598
$Pb_{1-x}Sn_xSe$
Effects of reduced growth temperature on crystalline qualities and dopant diffusion in $Pb_{1-x}Sn_xSe$/PbSe layers grown by MBE, 317
PbTe
Tunneling spectrum characteristic reflecting discrete energy levels in Pb(Tl)Te Films, 27
Pd
Ohmic contacts to p-type ZnTe using electroless Pd, 508
Persistent photoconductivity
A research on the persistent photoconductivity behavior of GaN thin films deposited by r.f. magnetron sputtering, 642
Phase transitions
The influence of silver on the structure and mechanical properties of (TiAl)-based intermetallics, 43
Phase transitions - clusters
Plasmon loss features of germanium nanocrystals fabricated by the cluster beam evaporation technique, 481
Phosphorus segregation
Evaluation of the initial oxidation of heavily phosphorus doped silicon surfaces using angle-dependent X-ray photoelectron spectroscopy, 393
Photoacoustic spectra
Piezoelectric photoacoustic spectra of $CuInSe_2$ thin film grown by molecular beam epitaxy, 591
Photochromism
Effect of a CdS interlayer in thermochromism and photochromism of MoO_3 thin films, 202
Photoconductivity
Optical and electrical properties of embedded silver nanoparticles at low temperatures, 175
Photoelectron spectroscopy
In situ observation of a high-temperature Si(001) surface during SiH_2Cl_2 exposure by photoelectron spectroscopy, 354
Photoinduction
Photoinduced changes of the structure and index of refraction of amorphous As–S films, 484
Photoluminescence
Effect of dopant flow rate upon photoluminescence properties in aluminum-doped ZnTe layers grown by MOVPE, 512
Photoreflectance
X-ray photoemission and photoreflectance study of Au/ultra-thin Si/*n*-GaAs Schottky contacts and hydrogen plasma treated semi-insulating GaAs surfaces, 328
Photovoltaic device
Preparation and characterization of (Cd,Zn)S thin films by chemical bath deposition for photovoltaic devices, 516
Physical vapour deposition
Deposition and characterisation of TiAlBN coatings produced by direct electron-beam evaporation of Ti and Ti–Al–B–N material from a twin crucible source, 242
Piezoelectric effect
Influence of substrate misorientation on the structural characteristics of InGaAs/GaAs MQW on (111)B GaAs grown by MBE, 558
Piezoelectric properties
Reactive pulsed laser deposition of piezoelectric and ferroelectric thin films, 90
Planar magnetron sputtering
Abnormal residual stress state in ZnO films synthesized by planar magnetron sputtering system with two facing targets, 164
Plasma
The control of film stress using ionised magnetron sputter deposition, 39
Plasma assisted deposition
MgO thin film deposition using TVA (thermoionic vacuum arc), 63
Plasma oxidation
Radiation enhanced growth rates during plasma oxidation of silicon, 420
Plasma polymerization
Deposition and properties of plasma polymer films made from thiophenes, 338
Plasma polymerized polyaniline film
A new type of CO_2 sensor built up with plasma polymerized polyaniline thin film, 313
Plasma processing
Reduction of thin oxide layer on $Fe_{60}Ni_{40}$ substrates in hydrogen plasmas, 101
Plasma processing and deposition
Investigation of SiO_2 deposition processes with mass spectrometry and optical emission spectroscopy in plasma enhanced chemical vapor deposition using tetraethoxysilane, 148
Anisotropic inductively coupled plasma etching of silicon with pure SF_6, 378
Effects of plasma etching on DLC films, 381

Full composition range silicon oxynitride films deposited by ECR-PECVD at room temperature, 437
Low temperature growth of p-type crystalline silicon films by ECR plasma CVD, 571
Plasmons - clusters
Plasmon loss features of germanium nanocrystals fabricated by the cluster beam evaporation technique, 481
PLD
Reactive pulsed laser deposition of piezoelectric and ferroelectric thin films, 90
Point defects
On the kinetics of generation of point defects in the Si–SiO_2 system, 412
Point defects, dopant atoms, and compensation effects in CdSe and CdS cleavage surfaces, 537
Poly(3-octylthiophene)
Electrical properties of polymer/Si heterojunctions, 469
Polycrystalline
Enhancement of crystallization of Si films on quartz substrates by electric fields, 288
Polymer films PMA
Composition and properties of thin solid films on porous silicon surface, 335
Poly-Silicon
Enhancement of crystallization of Si films on quartz substrates by electric fields, 288
Evaluation of the initial oxidation of heavily phosphorus doped silicon surfaces using angle-dependent X-ray photoelectron spectroscopy, 393
Porous silicon
The metastability of porous silicon/crystalline silicon structure, 277
Composition and properties of thin solid films on porous silicon surface, 335
Potential barrier
Poole–Frenkel conductivity prior to electroforming in evaporated Au-SiO_x-Au sandwich structures, 94
Protecting layer
MgO thin film deposition using TVA (thermoionic vacuum arc), 63
Pulsed laser ablation
Epitaxial growth and transport properties of *a*-axis oriented Hg-cuprate thin films, 98
Pure aluminum
Relationship of grain nanostructure and orientation in whisker growth on aluminum thin films on glass substrates, 461
Pure thin films
Formation of pure thin films by means of self-sputtering deposition, 60
Pyrolysis
Preparation and Properties of Boron Thin Films, 342
P-ZnTe
Ohmic contacts to p-type ZnTe using electroless Pd, 508
PZT
Reactive pulsed laser deposition of piezoelectric and ferroelectric thin films, 90
Piezoelectric photoacoustic spectra of $CuInSe_2$ thin film grown by molecular beam epitaxy, 591

Raman bands
Photoinduced changes of the structure and index of refraction of amorphous As–S films, 484
Raman scattering
Structural analysis of nanocrystalline SiC thin films grown on silicon by ECR plasma CVD, 292
Effects of plasma etching on DLC films, 381
Low temperature growth of p-type crystalline silicon films by ECR plasma CVD, 571
Raman Spectroscopy
Raman and reflection anisotropy spectroscopic studies of GaN and AlN growth on GaAs(100), 575
Rapid thermal annealing
Electrical characterisation of RF sputtered tantalum oxide films rapid thermal annealed with Ar, N_2, O_2 and N_2O, 105
Optical absorption in amorphous hydrogenated silicon nitride thin films deposited by the electron cyclotron resonance plasma method and subjected to rapid thermal annealing, 433
Rapid thermal processing
Co-sputtered Ru-Ti alloy electrodes for DRAM applications, 598
Reaction kinetics
The properties of reactively-sputtered, stoichiometry-controlled and optimum-conductivity transparent indium oxide films as a function of their titanium, aluminium and zinc content; comparisons with the use of tin as a dopant, 115
Reactive co-evaporation
Reactive co-evaporation of Si and Ge in oxygen atmospheres, 13
Reactive deposition
Pulsed magnetron sputtering of reactive compounds, 85
Reactive sputter deposition
The determination of nitrogen in Cr–N system by RBS and the weight gain technique, 265
Reactive sputtering
Energetic oxygen particles in the reactive sputtering of Zn targets in Ar/O_2 atmospheres, 81
Nanohardness and chemical bonding of boron nitride films, 238
Resistivity and structural defects of reactively sputtered TiN and HfN films, 246
Reflectance anisotropy
Incorporation of Ga metalorganic precursors during transients at the start of GaAs growth in CBE, 554
Reflectance anisotropy spectroscopy
Raman and reflection anisotropy spectroscopic studies of GaN and AlN growth on GaAs(100), 575
Reflection electron microscopy
REM studies of the roughening transitions of Si high index surfaces, 423
Reflection high energy electron diffraction
REM studies of the roughening transitions of Si high index surfaces, 423
The (3×3) reconstruction and its evolution during the nitridation of GaAs(001), 567
Residual strain
Abnormal residual stress state in ZnO films synthesized by planar magnetron sputtering system with two facing targets, 164

Residual stress
Residual stress in TiN film deposited by arc ion plating, 257
Resistivity
Transparent conductive ZnO:Al films by reactive co-sputtering from separate metallic Zn and Al targets, 130
Effect of partial pressure on the internal stress and the crystallographic structure of r.f. reactive sputtered Ti–N films, 230
Co-sputtered Ru-Ti alloy electrodes for DRAM applications, 598
RF magnetron sputtering
Vanadium oxide thin films deposited onto Cu buffer layer by RF magnetron sputtering, 168
RF reactive sputtering
Preparation and optical transmittance of titanium hydride (deuteride) films by r.f. reactive sputtering, 195
RF-DC
Effect of DC bias on the deposition rate using RF-DC coupled magnetron sputtering for Mg thin films, 57
Roughness
Complete optical characterization of imperfect hydrogenated amorphous silicon layers by spectroscopic ellipsometry and spectroscopic reflectometry, 295
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
Rutherford backscattering spectrometry
Bayesian error analysis of Rutherford backscattering spectra, 31
Preparation and optical transmittance of titanium hydride (deuteride) films by r.f. reactive sputtering, 195
The determination of nitrogen in Cr–N system by RBS and the weight gain technique, 265
Low temperature growth of p-type crystalline silicon films by ECR plasma CVD, 571
Rutile
Reactively sputtered TiO_{2-x} thin films with plasma-emission-controlled departure from stoichiometry, 152

Sandwich structures
Poole–Frenkel conductivity prior to electroforming in evaporated Au-SiO_x-Au sandwich structures, 94
Sapphire
Blue light emitting laser diodes, 345
Scanning electron microscopy
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Scanning electron microscopy micrographs
Vanadium oxide thin films deposited onto Cu buffer layer by RF magnetron sputtering, 168
Preparation and optical transmittance of titanium hydride (deuteride) films by r.f. reactive sputtering, 195
Scanning electron spectroscopy
Surfactant effect of atomic hydrogen on silicide-formation of nickel on Si(110) surfaces, 612
Scanning tunneling microscopy
Ordering of PVBA on amorphous SiO_2 and Pd(110), 171
Point defects, dopant atoms, and compensation effects in CdSe and CdS cleavage surfaces, 537
Initial stage oxidation at an unpaired dangling bond site on a Si(100)-2 × 1-H surface, 550
Effects of initial surface states on formation processes of epitaxial $CoSi_2$(100) on Si(100), 562
Schottky
X-ray photoemission and photoreflectance study of Au/ultra-thin Si/*n*-GaAs Schottky contacts and hydrogen plasma treated semi-insulating GaAs surfaces, 328
Schottky barrier
Electrical properties of polymer/Si heterojunctions, 469
Schottky diodes
Argon plasma sputter etching induced defect levels in strained, epitaxial p-type Si–Ge alloys, 416
Scratch test
Structure and adhesive properties of TiN films reactively deposited by plasma-free sputtering, 273
Second harmonic generation
Ordering of PVBA on amorphous SiO_2 and Pd(110), 171
Secondary ion mass spectrometry
Influence of B- and N-doping levels on the quality and morphology of CVD diamond, 627
Selective electrochemical profiling
Selective electrochemical profiling of threading defects in mismatched heteroepitaxial systems, 520
Selective sputtering
New Cr–B hard coatings by r.f.-plasma assisted magnetron sputtering method, 234
Self-sputtering deposition
Formation of pure thin films by means of self-sputtering deposition, 60
Semiconductor interface
Electrical properties of polymer/Si heterojunctions, 469
Semiconductor materials
Wide bandgap semiconductor materials for high temperature electronics, 616
Semiconductor–semiconductor heterostructures
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
Semiconductors
Annealing effects of $CuInSe_2$ films prepared by pulsed laser deposition, 123
Effect of In-content on the misfit dislocation interaction in InGaAs/GaAs layers, 302
Preparation and Properties of Boron Thin Films, 342
Real-time diagnostics of growth of silicon–germanium alloys on hydrogen-terminated and oxidized silicon (111) surfaces by spectroscopic ellipsometry, 427
XPS and TOFSIMS studies of shallow Si/$Si_{1-x}Ge_x$/Si layers, 583
Semi-insulating GaAs
X-ray photoemission and photoreflectance study of Au/ultra-thin Si/*n*-GaAs Schottky contacts and hydrogen plasma treated semi-insulating GaAs surfaces, 328
Silicon
Reactive co-evaporation of Si and Ge in oxygen atmospheres, 13
Enhancement of crystallization of Si films on quartz substrates by electric fields, 288
Hydrofluoric acid etching of ultra thin silicon oxide film fabricated by high purity ozone, 361
Lattice strain in oxidized Si nanostructure arrays from X-ray measurements, 365
Modeling of SiO_2/Si(100) interface structure by using extended Stillinger–Weber potential, 370

Anisotropic inductively coupled plasma etching of silicon with pure SF_6, 378
Interaction of H_2O clusters with hydrogen-terminated and clean Si(001) surfaces, 397
Radiation enhanced growth rates during plasma oxidation of silicon, 420
REM studies of the roughening transitions of Si high index surfaces, 423
Kelvin probe study of metastable states during initial oxygen adsorption dynamics on Si(111) 7 × 7, 492
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
Initial stage oxidation at an unpaired dangling bond site on a Si(100)-2 × 1-H surface, 550
Low temperature growth of p-type crystalline silicon films by ECR plasma CVD, 571
XPS and TOFSIMS studies of shallow $Si/Si_{1-x}Ge_x/Si$ layers, 583
Low temperature epitaxial growth of CeO_2(110) layers on Si(100) using electron beam assisted evaporation, 594
Si–Ge
Argon plasma sputter etching induced defect levels in strained, epitaxial p-type Si–Ge alloys, 416
Si–SiO_2
On the kinetics of generation of point defects in the Si–SiO_2 system, 412
Si(001)
In situ observation of a high-temperature Si(001) surface during SiH_2Cl_2 exposure by photoelectron spectroscopy, 354
Si(100)
Molecular arrangement of organic crystal *N*,*N*′-dimethylperylene-3,4,9,10-bis(dicarboximide) studied with metastable de-excitation spectroscopy and atomic force microscopy, 309
Surfactant effect of atomic hydrogen on silicide-formation of nickel on Si(110) surfaces, 612
Si(110)
Surfactant effect of atomic hydrogen on silicide-formation of nickel on Si(110) surfaces, 612
Si(111)
Electron microscopy study of SiC obtained by the carbonization of Si(111), 305
Si/GaAs
X-ray photoemission and photoreflectance study of Au/ultrathin Si/*n*-GaAs Schottky contacts and hydrogen plasma treated semi-insulating GaAs surfaces, 328
Si/Ge
Effect of a ZnSe intralayer on the Si/Ge(111) heterojunction band offsets, 605
SiGe
Hydrogen adsorption and desorption on SiGe investigated by in situ surface infrared spectroscopy, 404
SiH_2Cl_2
In situ observation of a high-temperature Si(001) surface during SiH_2Cl_2 exposure by photoelectron spectroscopy, 354
Silicon carbide
Electron microscopy study of SiC obtained by the carbonization of Si(111), 305
Silicides
The oxidation behaviour of mixed tungsten silicon sputtered coatings, 51
Palladium silicide/oxide formations in Pd/SiO_2 complex films, 119
Surfactant effect of atomic hydrogen on silicide-formation of nickel on Si(110) surfaces, 612
Silicon carbide
Structural analysis of nanocrystalline SiC thin films grown on silicon by ECR plasma CVD, 292
Characterization of ohmic and Schottky contacts on SiC, 637
Silicon dioxide
An effect of preheat-treatment on the formation of titanium-oxide films by sintering a titanium/silicon-oxide structure in an oxygen atmosphere, 138
Oxidation kinetics of hydrogen-enriched Si(100) and Si(111) surfaces, 389
Silicon germanium
Doping and electrical characteristics of in situ heavily B-doped $Si_{1-x}Ge_x$ films epitaxially grown using ultraclean LPCVD, 541
Silicon nitride
LPCVD deposition of silicon nitride assisted by high density plasmas, 299
Optical absorption in amorphous hydrogenated silicon nitride thin films deposited by the electron cyclotron resonance plasma method and subjected to rapid thermal annealing, 433
Silicon oxidation
Spectroscopic ellipsometry characterization of strained interface region in thermally oxidized Si(111), 385
Silicon oxide
Electrical and structural properties of rapid thermal annealed RF sputtered silicon oxide films, 108
Investigation of SiO_2 deposition processes with mass spectrometry and optical emission spectroscopy in plasma enhanced chemical vapor deposition using tetraethoxysilane, 148
Hydrofluoric acid etching of ultra thin silicon oxide film fabricated by high purity ozone, 361
Lattice strain in oxidized Si nanostructure arrays from X-ray measurements, 365
Modeling of SiO_2/Si(100) interface structure by using extended Stillinger–Weber potential, 370
Compositional and structural transition layer studied by the energy loss of O 1s photoelectrons, 410
Silicon oxynitride
Full composition range silicon oxynitride films deposited by ECR-PECVD at room temperature, 437
Silver
The influence of silver on the structure and mechanical properties of (TiAl)-based intermetallics, 43
Silver nanoparticles
Optical and electrical properties of embedded silver nanoparticles at low temperatures, 175
Single source precursor
Low-temperature epitaxial growth of cubic SiC thin films on Si(111) using supersonic molecular jet of single source precursors, 650
SiO_2

Influences of deuterium atoms on local bonding structures of SiO_2 studied by HREELS, 408
SiO_2/Si interface
Spectroscopic ellipsometry characterization of strained interface region in thermally oxidized Si(111), 385
Soft-chemical methods
Novel methods for preparation of ion-exchangeable thin films, 156
Solar cells
Annealing effects of $CuInSe_2$ films prepared by pulsed laser deposition, 123
Solid–liquid interfaces
Interaction of H_2O clusters with hydrogen-terminated and clean Si(001) surfaces, 397
Spectroscopic ellipsometry
Spectroscopic ellipsometry characterization of strained interface region in thermally oxidized Si(111), 385
Spin coating
Novel methods for preparation of ion-exchangeable thin films, 156
ψ-Splitting
Abnormal residual stress state in ZnO films synthesized by planar magnetron sputtering system with two facing targets, 164
Sputtering
Preparation of Mg_xNi thin films by RF-DC coupled magnetron sputtering, 21
A hybrid simulation of high pressure sputtering, combining the Monte Carlo method and the diffusive approach, 24
Non-destructive chemical analysis of sandwich structures by means of soft X-ray emission, 35
The influence of silver on the structure and mechanical properties of (TiAl)-based intermetallics, 43
The oxidation behaviour of mixed tungsten silicon sputtered coatings, 51
Effect of DC bias on the deposition rate using RF-DC coupled magnetron sputtering for Mg thin films, 57
Electrical characterisation of RF sputtered tantalum oxide films rapid thermal annealed with Ar, N_2, O_2 and N_2O, 105
Electrical and structural properties of rapid thermal annealed RF sputtered silicon oxide films, 108
The properties of reactively-sputtered, stoichiometry-controlled and optimum-conductivity transparent indium oxide films as a function of their titanium, aluminium and zinc content; comparisons with the use of tin as a dopant, 115
Characterization of mechanical properties of VO_2 thin films on sapphire and silicon by ultra-microindentation, 134
Reactively sputtered TiO_{2-x} thin films with plasma-emission-controlled departure from stoichiometry, 152
Effect of partial pressure on the internal stress and the crystallographic structure of r.f. reactive sputtered Ti–N films, 230
New Cr–B hard coatings by r.f.-plasma assisted magnetron sputtering method, 234
Titanium carbide film deposition by DC magnetron reactive sputtering using a solid carbon source, 254
Structure and adhesive properties of TiN films reactively deposited by plasma-free sputtering, 273
Infra-red, X-ray photoelectron spectroscopy and electrical studies of r.f. sputtered amorphous silicon carbide films, 441
Effect of deposition conditions of buffer layer on the characteristics of $(Ba,Sr)TiO_3$ thin films fabricated by a self-buffering process, 453
The influence of cooling water flowing in the sputtering target on aluminum based thin film nanostructure deposited on glass substrate, 465
Effects of nitrogen/argon ratio on composition and structure of InN films prepared by r.f. magnetron sputtering, 524
A research on the persistent photoconductivity behavior of GaN thin films deposited by r.f. magnetron sputtering, 642
Standard reference materials
The determination of nitrogen in Cr–N system by RBS and the weight gain technique, 265
Stress
Hard a-C:H films deposited at high deposition rates, 222
Effect of partial pressure on the internal stress and the crystallographic structure of r.f. reactive sputtered Ti–N films, 230
Lattice strain in oxidized Si nanostructure arrays from X-ray measurements, 365
Structural phase transition
REM studies of the roughening transitions of Si high index surfaces, 423
Structural properties
Transparent conductive ZnO:Al films by reactive co-sputtering from separate metallic Zn and Al targets, 130
Excitation energy dependence of luminescent sol-gel organically modified silicates, 476
Thermally and photoinduced changes of structure and optical properties of As–Ga–S amorphous films and glasses, 488
Sulphur hexafluoride
Anisotropic inductively coupled plasma etching of silicon with pure SF_6, 378
Superlattice
Structural analysis of epitaxial TiAg/MgO superlattices prepared by multi-evaporation, 545
Supersonic jet epitaxy
Low-temperature epitaxial growth of cubic SiC thin films on Si(111) using supersonic molecular jet of single source precursors, 650
Surface chemical reaction
Interaction of H_2O clusters with hydrogen-terminated and clean Si(001) surfaces, 397
Surface adsorbate vibrations
Hydrogen adsorption and desorption on SiGe investigated by in situ surface infrared spectroscopy, 404
Surface cleaning
Surface cleaning and nitridation of compound semiconductors using gas-decomposition reaction in Cat-CVD method, 528
Surface conductivity
The effect of hydrogen on the electronic properties of CVD diamond films, 623
Surface diffusion
Recent understandings of elementary growth processes in MBE of GaAs, 495
Surface morphology
Evolution of crystals during vacuum deposition, 9
Effect of surface roughness on magnetic properties of Fe films deposited by dual ion beam sputtering, 67
TEA CO_2 laser-induced damage of low-thickness TiN coatings, 269

Extremely smooth surface morphologies in $N_2/H_2/CH_4$ based low energy chemically assisted ion beam etching of InP/GaInAsP, 374
Surface nitridation
Surface cleaning and nitridation of compound semiconductors using gas-decomposition reaction in Cat-CVD method, 528
Surface roughness
In situ ellipsometric studies of the a-Si:H growth using an expanding thermal plasma, 281
Surface states
Effects of initial surface states on formation processes of epitaxial $CoSi_2$(100) on Si(100), 562
Surface structure
Influence of diamond crystal orientation on their tribological behaviour under various environments, 226
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
Surface thermodynamics
XPS and TOFSIMS studies of shallow Si/$Si_{1-x}Ge_x$/Si layers, 583
Surface thermodynamics (including phase transitions)
Scaling behaviour and evolution of ferromagnetism in epitaxial Fe/GaAs(100) and Fe/InAs(100), 210
Surface thin film coating
Composition and properties of thin solid films on porous silicon surface, 335
Surfactants
Bi surfactant mediated epitaxy of Ge on Si(111), 579
Synchrotron radiation
In situ observation of a high-temperature Si(001) surface during SiH_2Cl_2 exposure by photoelectron spectroscopy, 354
Synchrotron radiation-excited growth
Homoepitaxial growth of ZnTe by synchrotron radiation using metalorganic sources, 504

Taguchi method
Relationship of grain nanostructure and orientation in whisker growth on aluminum thin films on glass substrates, 461
Tantalum oxide
Halide chemical vapour deposition of Ta_2O_5, 111
Optical and electrical characterisation of Ta_2O_5 thin films for ionic conduction applications, 449
Tantalum pentoxide
Electrical characterisation of RF sputtered tantalum oxide films rapid thermal annealed with Ar, N_2, O_2 and N_2O, 105
TDSC
Composition and properties of thin solid films on porous silicon surface, 335
{111} Texture
Residual stress in TiN film deposited by arc ion plating, 257
Thermal desorption
Hydrogen adsorption and desorption on SiGe investigated by in situ surface infrared spectroscopy, 404
Thermal spike effect
An estimation of optimum Ar ion bombardment energy for good Fe films applying thermal spike effect, 71
Thermionic vacuum arc
MgO thin film deposition using TVA (thermoionic vacuum arc), 63
Thermochromism
Effect of a CdS interlayer in thermochromism and photochromism of MoO_3 thin films, 202
Thin film devices
Excitation energy dependence of luminescent sol-gel organically modified silicates, 476
Thin film growth
Effect of substrate temperature on properties of thin films prepared by RF sputtering from $CuInSe_2$ target with Na_2Se, 320
Thin films
The control of film stress using ionised magnetron sputter deposition, 39
Epitaxial growth and transport properties of *a*-axis oriented Hg-cuprate thin films, 98
Halide chemical vapour deposition of Ta_2O_5, 111
Preparation of $CuIn(S_xSe_{1-x})_2$ thin films by excimer laser ablation from binary compounds, 199
Resistivity and structural defects of reactively sputtered TiN and HfN films, 246
Pbs–Cds bilayers prepared by the chemical bath deposition technique at different reaction temperatures, 587
Thin silver films
Ellipsometric studies on thin silver films epitaxially grown on Si(111), 187
Thiophenes
Deposition and properties of plasma polymer films made from thiophenes, 338
Threading defects
Selective electrochemical profiling of threading defects in mismatched heteroepitaxial systems, 520
TiAg
Structural analysis of epitaxial TiAg/MgO superlattices prepared by multi-evaporation, 545
TiC
Titanium carbide film deposition by DC magnetron reactive sputtering using a solid carbon source, 254
TiN film
Residual stress in TiN film deposited by arc ion plating, 257
Tin oxide
Transparent conductive tin oxide films by photochemical vapour deposition, 142
Titanium
An effect of preheat-treatment on the formation of titanium-oxide films by sintering a titanium/silicon-oxide structure in an oxygen atmosphere, 138
Titanium aluminides
The influence of silver on the structure and mechanical properties of (TiAl)-based intermetallics, 43
Titanium deutride films
Preparation and optical transmittance of titanium hydride (deuteride) films by r.f. reactive sputtering, 195
Titanium dioxide
An effect of preheat-treatment on the formation of titanium-oxide films by sintering a titanium/silicon-oxide structure in an oxygen atmosphere, 138
Reactively sputtered TiO_{2-x} thin films with plasma-emission-controlled departure from stoichiometry, 152
Titanium hydride films
Preparation and optical transmittance of titanium hydride (deuteride) films by r.f. reactive sputtering, 195

Titanium nitride
Effect of partial pressure on the internal stress and the crystallographic structure of r.f. reactive sputtered Ti–N films, 230
Resistivity and structural defects of reactively sputtered TiN and HfN films, 246
TEA CO_2 laser-induced damage of low-thickness TiN coatings, 269
Structure and adhesive properties of TiN films reactively deposited by plasma-free sputtering, 273
Topography
Instability of 2D Ge layer near the transition to 3D islands on Si(111), 532
Transients
Incorporation of Ga metalorganic precursors during transients at the start of GaAs growth in CBE, 554
Transition layer
Compositional and structural transition layer studied by the energy loss of O 1s photoelectrons, 410
Transition metal oxides
Study of electrochromic cells incorporating WO_3, MoO_3, WO_3–MoO_3 and V_2O_5 coatings, 183
Transmission electron microscopy
Relationship of grain nanostructure and orientation in whisker growth on aluminum thin films on glass substrates, 461
Influence of substrate misorientation on the structural characteristics of InGaAs/GaAs MQW on (111)B GaAs grown by MBE, 558
Growth of $GaAs_{1-x}N_x$ on GaAs (100) by chemical beam epitaxy, 646
Tribology
Influence of diamond crystal orientation on their tribological behaviour under various environments, 226
Deposition and characterisation of TiAlBN coatings produced by direct electron-beam evaporation of Ti and Ti–Al–B–N material from a twin crucible source, 242
Triethylgallium
Growth of $GaAs_{1-x}N_x$ on GaAs (100) by chemical beam epitaxy, 646
Tungsten
Characterization of ohmic and Schottky contacts on SiC, 637
Tungsten silicide
The oxidation behaviour of mixed tungsten silicon sputtered coatings, 51
Tungsten trioxide
Deep profiles of lithium in electrolytic structures of ITO/WO_3 for electrochromic applications, 179
Tunneling spectroscopy
Tunneling spectrum characteristic reflecting discrete energy levels in Pb(Tl)Te Films, 27

Unipolar pulsed magnetron sputtering
Pulsed magnetron sputtering of reactive compounds, 85

Vacuum evaporation
Study of electrochromic cells incorporating WO_3, MoO_3, WO_3–MoO_3 and V_2O_5 coatings, 183
Vanadium oxide
Characterization of mechanical properties of VO_2 thin films on sapphire and silicon by ultra-microindentation, 134
Vanadium oxide thin films deposited onto Cu buffer layer by RF magnetron sputtering, 168

W–Si–N films
The oxidation behaviour of mixed tungsten silicon sputtered coatings, 51
Water
Interaction of H_2O clusters with hydrogen-terminated and clean Si(001) surfaces, 397
Wavy interface morphology
Columnar growth structure and evolution of wavy interface morphology in amorphous multilayered thin films, 5
Weight gain technique
The determination of nitrogen in Cr–N system by RBS and the weight gain technique, 265
Whisker
Relationship of grain nanostructure and orientation in whisker growth on aluminum thin films on glass substrates, 461
The influence of cooling water flowing in the sputtering target on aluminum based thin film nanostructure deposited on glass substrate, 465
Work function
Kelvin probe study of metastable states during initial oxygen adsorption dynamics on Si(111) 7×7, 492

X-ray absorption
Nanohardness and chemical bonding of boron nitride films, 238
X-ray diffraction
Effect of DC bias on the deposition rate using RF-DC coupled magnetron sputtering for Mg thin films, 57
Abnormal residual stress state in ZnO films synthesized by planar magnetron sputtering system with two facing targets, 164
Preparation and optical transmittance of titanium hydride (deuteride) films by r.f. reactive sputtering, 195
Effect of partial pressure on the internal stress and the crystallographic structure of r.f. reactive sputtered Ti–N films, 230
Structural analysis of nanocrystalline SiC thin films grown on silicon by ECR plasma CVD, 292
Lattice strain in oxidized Si nanostructure arrays from X-ray measurements, 365
Low temperature growth of p-type crystalline silicon films by ECR plasma CVD, 571
X-ray emission
Non-destructive chemical analysis of sandwich structures by means of soft X-ray emission, 35
X-ray phi-scan measurement
Low-temperature epitaxial growth of cubic SiC thin films on Si(111) using supersonic molecular jet of single source precursors, 650
X-ray photoelectron spectra - surface analysis
Plasmon loss features of germanium nanocrystals fabricated by the cluster beam evaporation technique, 481
X-ray photoelectron spectroscopy (XPS)
Preparation of Mg_xNi thin films by RF-DC coupled magnetron sputtering, 21
Preparation of ZnO films by atmospheric pressure chemical-vapor deposition using zinc acetylacetonate and ozone, 145
X-ray photoemission and photoreflectance study of Au/ultra-

thin Si/*n*-GaAs Schottky contacts and hydrogen plasma treated semi-insulating GaAs surfaces, 328
ZnS wide band gap semiconductor thin film electronic structure sensitivity to Mn impurity, 332
Hydrofluoric acid etching of ultra thin silicon oxide film fabricated by high purity ozone, 361
Compositional and structural transition layer studied by the energy loss of O 1s photoelectrons, 410
Infra-red, X-ray photoelectron spectroscopy and electrical studies of r.f. sputtered amorphous silicon carbide films, 441
The (3 × 3) reconstruction and its evolution during the nitridation of GaAs(001), 567
XPS and TOFSIMS studies of shallow $Si/Si_{1-x}Ge_x/Si$ layers, 583
Bond formation in ion beam synthesised amorphous gallium nitride, 632
Characterization of ohmic and Schottky contacts on SiC, 637
X-ray stress measurement
Residual stress in TiN film deposited by arc ion plating, 257

Zinc oxide
Transparent conductive ZnO:Al films by reactive co-sputtering from separate metallic Zn and Al targets, 130
Preparation of ZnO films by atmospheric pressure chemical-vapor deposition using zinc acetylacetonate and ozone, 145
Zincblende GaN
The (3 × 3) reconstruction and its evolution during the nitridation of GaAs(001), 567
ZnO
Energetic oxygen particles in the reactive sputtering of Zn targets in Ar/O_2 atmospheres, 81
Reactive pulsed laser deposition of piezoelectric and ferroelectric thin films, 90
ZnO:Al
Properties of films of multilayered ZnO:Al and ZnO deposited by an alternating sputtering method, 160
ZnO film
Abnormal residual stress state in ZnO films synthesized by planar magnetron sputtering system with two facing targets, 164
ZnTe
Homoepitaxial growth of ZnTe by synchrotron radiation using metalorganic sources, 504
Effect of dopant flow rate upon photoluminescence properties in aluminum-doped ZnTe layers grown by MOVPE, 512
